Highly skilled Full Stack Developer with expertise in JavaScript, React, Node.js, Go and cloud technologies. Adept at building scalable, high-performance applications and delivering impactful solutions. Committed to excellence and continuous growth.

Working Experience

ENSS TECHNOLOGIES PRIVATE LIMITED -Bengaluru, Karnataka,India

Nov/2021 – Present

Know your provider

Developed an all-in-one solution for screening, enrolling, and monitoring healthcare providers' eligibility to process insurance claims.

Built automated workflows to verify provider data and ensure compliance, reducing verification time by 40%.

Designed and optimized a secure backend using Node.js and MySQL to manage provider data and claims efficiently.

Integrated third-party APIs for real-time verification and created React-based dashboards for tracking claim statuses.

Catalyst Seller Management

This project involves building a catalyst and product management system using AngularJS for the frontend and a microservices-based backend. The backend will be divided into independent services, each handling specific functionalities, such as product details, catalyst management, and order processing. The goal is to create a scalable, modular, and maintainable system for efficient product and catalyst tracking.

Technical Skills

:JavaScript , Go , Reactjs ,Angularjs ,Nodejs , Typescript,Html5,Css

: MongoDB

:AWS , Git, REST API,React Testing tools, Jest and Karma,Jest

EDUCATION & CERTIFICATIONS:

Bachelor of Science (Computer science)

(Khallikote autonomous college 2017-2020)
